Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -(b) the invention was patented or described in a
printed publication in this or a foreign country or
in public use or on sale in this country, more than
one year prior to the date of application for patent
in the United States.

2. Claims 6-8 are rejected under 35 U.S.C. § 102(b) as being anticipated by Fuji (U.S. Patent 5,852,599).

Fuji teaches a recording medium having all the elements and means as recited in claims 6-8. For example, Fuji teaches the following:

- (a) as in claim 6, the recording medium 1 provided with a first track area 9 where one side wall has a land 4' wobbled (Fig. 1);
- (b) as in claim 6, a second track area 3 adjacent the first track area 9 (Fig. 1);
- (c) as in claim 6, the other side wall 8 at a nonwobbled side in the first track 9 has a land 4 wobbled (Fig. 1);
- (d) as in claim 6, the recording medium 1 has an adjusting area 5 showing a correspondence of a wobbling

polarity to a track area (Figs. 5a and 5b; column 13, lines 50-61);

- (e) as in claim 7, different widths are given to the first track area 9 and second track area 3 in the adjusting area 5 (Fig. 1; widths of tracks 9 and 3 at position 5 are different); and
- (f) as in claim 8, in case that the recording medium 1 is a disk, the adjusting area 5 is provided in at least one of innermost and outermost areas of the disk (Fig. 1; adjusting area 5 exists in the inner track and the outer track).
- 3. Claims 9-11 are rejected under 35 U.S.C. § 102(b) as being anticipated by Fuji (U.S. Patent 5,852,599).

Fuji teaches a recording medium having all the elements and means as recited in claims 9-11. For example, Fuji teaches the following:

- (a) as in claim 9, the recording medium 1 provided with a first track area 3 where one side wall 4 has a wobbling groove 2 (Fig. 1);
- (b) as in claim 9, a second track area 9 adjacent the first track area 3 (Fig. 1);

- (c) as in claim 9, the other side wall 8 at a nonwobble side in the first track 3 has a wobbling groove 9
 (Fig. 1);
- (d) as in claim 9, the recording medium 1 has an adjusting area 5 showing a correspondence of a wobbling polarity to a track area (Figs. 5a and 5b; column 13, lines 50-61);
- (e) as in claim 10, different widths are given to the first track area 3 and second track area 9 in the adjusting area 5 (Fig. 1; widths of tracks 3 and 9 at position 5 are different); and
- (f) as in claim 10, in case that the recording medium 1 is a disk, the adjusting area 5 is provided in at least one of innermost and outermost areas of the disk (Fig. 1; adjusting area 5 exists in the inner track and the outer track).

4. Any response to this action should be mailed to:

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Or faxed to:

(571) 273-8300 (for formal communications intended for entry. Or:

(571) 273-7585, (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Any inquiry of a general nature or relating to the status of this application should be directed USPTO Contact Center (703) 308-4357; Electronic Business Center (703) 305-3028.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim CHU whose telephone number is (571) 272-7585 between 9:30 am to 6:00 pm, Monday to Friday.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
